CONTENTS OF VOLUME 8

No. 1 January–February 1993

Short communication

1 **An electro-optically tunable filter for wavelength demultiplexing**
M. López-Amo, J. M. López-Higuera and M. A. Muriel

Papers

7 **Integrated acousto-optic correlator using a biaxial focusing grating coupler**
M. Fujimura, T. Suhara and H. Nishihara

13 **Optical fibre temperature sensor based on liquid crystals**
B. D. Gupta, A. Sharma and R. Goyal

21 **Configuration and characteristics of distributed reflective optical active star couplers**
J. W. Liaw, Y. K. Chen and W. Y. Guo

33 **Determination of the spot size for real single mode fibres by far field pattern technique**
M. Pospíšilová and M. Schneiderová

39 **Design of Manchester-PCM/demodulation circuitry for in-house wireless infrared communication system**
C. J. Georgopoulos and S. H. Soultanidis

49 **Wavelength tuning analysis in three-electrode DFB lasers**
T. Sphicopoulos, I. Orfanos, A. Tsigopoulos and C. Caroubalos

57 **Dynamic phase measurement over a large dynamic range in a fibre optic Sagnac interferometer**
W. Jin, D. Uttamchandani and B. Culshaw

67 **A physical model of $GaAs_{0.6}P_{0.4}$ p–n junction irradiated by fast electrons**
I. Rizhikov and G. Svechnikov

77 **Passive multiplexing of silicon microresonator sensors of identical characteristics using a high speed fibre optic TDM system**
Y. J. Rao, D. Uttamchandani, B. Culshaw, P. Steer and J. Briancon

87 **Porous clad fibres as sensor probes**
V. Ruddy and K. Lardner

97 **Announcement**

No. 2 March–April 1993

Short communications

99 **Self-excitation of microresonators**
A. V. Churenkov

105 **Two-dimensional thermal analysis of oxide-isolated-stripe diode lasers with application of the finite-element method**
R. P. Sarzala

Papers

109 **Detailed analysis of V-groove front surfaces for solar cells**
J. J. Liou

123 **Resultant numerical aperture of microlens-ended optical fibres**
T. Eftimov and P. Hitchen

133 **Chemical sensing with optical fibres**
A. M. Scheggi and F. Baldini

157 **An experiment on photonic ATM switching system using coded HDTV signals**
Y. Takahashi, K. Ando, T. Kinoshita, H. Inoue, M. Miyagi and E. Amada

171 **Proposed calculation of distance safety limits in a wireless infrared system for indoor applications**
P. Georgopoulos

179 **Temperature-independent birefringent fibres**
D. Wong and S. Poole

187 **Design, construction and experimental verification of a fibre optic sensor based on microbending loss mechanism**
G. N. Bakalidis, N. A. Georgoulas, N. J. Karafolas and C. J. Georgopoulos

193 **Fibre optic pH sensor based on a chemically modified porous polymer film immobilized with colorimetric indicator**
J. Liu, M. R. Shahriari, G. H. Sigel and A. S. Goldman

203 **Book reviews**

No. 3 May–June 1993

205 **Editorial**
P. A. Davies and B. L. Weiss

Short communication

207 **Two new concepts for design of time division multiplexed sensors The two wavelength time division multiplexing and the selective addressing**
E. Perraud and J. Isbert

Papers

221 **1·3 μm infrared laser non-invasive probe of silicon integrated circuits**
J. Wu

229 **Probing of integrated optical waveguides by thermal pulses**
R. Rimeika and D. Čiplys

237 **Coupling improvement of buried circular-like Ti/Mg : $LiNbO_3$ channel waveguide with single mode fibre by index profile control**
L. Jiunn-Chyi and L. Ching-Ting

247 **Peripheral photoresponse of a p–n junction**
M. Müller, H.-E. Ponath and H. Bergner

259 **Measurement of electric field dependent refractive index variations in GaAs/AlGaAs quantum well waveguides**
H. U. Rahman, D. W. Langer, J. Falk, S. H. Park, M. E. Warren, D. R. Myers, T. M. Brennan and B. E. Hammons

267 **Optical to radio frequency converter using tunable directional coupler filter with electronic feedback**
A. Gh. Podoleanu, I. L. Muntean and L. I. Gh. Ionescu

279 **Dynamics and hole burning in uniform DFB semiconductor lasers**
L. M. Zhang, J. E. Carroll and J. E. A. Whiteaway

293 **Book reviews**

No. 4 July–August 1993

295 **Preface**
B. Culshaw

297 **Introduction**
B. Pal

299 **Dispersion and nonlinear effects in optical fibres**
A pedagogical account
A. Ghatak and A. Kumar

319 **Performance comparison of different configurations for second harmonic generation in planar waveguides**
K. Thyagarajan, V. Mahalakshmi and M. R. Shenoy

333 **Performance simulation of ion-exchange waveguides**
P. J. Masalkar, V. Venkateswara Rao and R. S. Sirohi

341 **Analysis of leaky modes in ARROW structures by a simple numerical method**
M. P. Singh and E. K. Sharma

351 **Coupling characteristics of a polarization splitting directional coupler**
N. Gupta, E. K. Sharma and M. P. Singh

363 **TE-polarized surface plasmon polaritons in metal films bounded by fifth-order nonlinear dielectric media**
S. Roy and P. C. Subramaniam

375 **Highly selective LP_{01} mode coupler/filter for dual mode elliptical core fibres**
A. Kumar, R. K. Varshney and S. Ghadirli

385 **Coupled-mode analysis of three-wave mixing process in crystal cored fibres**
R. Balasubramanian and A. Selvarajan

399 **Space-time and gauge symmetry and solitons in optical fibres**
A. Kumar and A. K. Ghatak

409 **Evanescent wave absorption sensors based on uniform and tapered fibres**
A comparative study of their sensitivities
B. D. Gupta, A. Sharma and C. D. Singh

419 **A flexural push–pull fibre-optic hydrophone incorporating acceleration cancelling and feedback stabilization**
S. Uchil, K. Phani Bhushan, G. M. Naik and A. Selvarajan

425 **Excess transverse magnetic component in quantum well lasers**
S. Banerjee, A. K. Srivastava and A. Bandyopadhyay

431 **Gain mechanism in GaAs metal–semiconductor–metal photodetectors**
A. K. Srivastava, S. C. Purandare, V. T. Karulkar and B. M. Arora

437 **Growth of InGaAs/InP for long-wavelength photodetectors by low-pressure metallorganic vapour phase epitaxy**
B. M. Arora, A. K. Srivastava, S. Banerjee and A. Shah

443 **On the equalization of FM response of laser diodes**
G. Soundra Pandian and S. Dilwali

451 **Analysis of a new technique for optical DPSK transmission without external phase modulator**
D. Datta

459 **Performance analysis of MSK–FM hybrid scheme in optical communication**
R. Gangopadhyay and S. P. Mazumder

465 **Design and development of high speed optical interface for synchronous optical networks**
P. Mathur, A. Mathur, P. Dhananjay, A. Srivastava, N. Madan and D. Manna

477 **A reliable fibre-optic ring network for process control**
A. Jhunjhunwala, M. Archana Rao, B. Murugesh, T.A. Gonsalves and B. Ramamurthi

493 **Photoacoustic study of periodic dielectric multilayer stack**
A. Philip, P. Radhakrishnan, V. P. N. Nampoori and C. P. G. Vallabhan

501 **Photoacoustic study on bleaching of cresyl violet in polyvinyl alcohol by laser light**
A. Philip, P. Radhakrishnan, V. P. N. Nampoori and C. P. G. Vallabhan

505 **Crystal violet doped gelatin**
A strongly bistable material at 803 nM
D. Ranganathan

509 **Book review**

No. 5/6 September–December 1993

Papers from Jena

511 **Editorial**
R. Th. Kersten and R. Willsch

513 **Realization of micro-optic and integrated optic components by electron-beam-lithographic surface profiling and ion exchange in glass**
E.-B. Kley, T. Possner and R. Göring

529 **Highly efficient blazed grating couplers in planar polymer waveguides**
R. Waldhäusl, P. Dannberg, E. B. Kley, A. Bräuer and W. Karthe

537 **New ARROW couplers and switches with significantly reduced coupling length**
R. Muschall, F. Lederer and U. Trutschel

547 **Integrated optical three-beam-interferometer for displacement measurements**
J. Bauer, E. Dammann, E. Fritsch and A. Rasch

555 **Investigations of an applanation tonometer with an integrated optical waveguide**
S. Görlich, K. Möhr, N. Klose, P. Pfeifer, P. Voigt and J. Wieser

563 **Bias stability of interferometric all-fibre gyroscopes with highly polarizing and depolarizing components**
S. Schröter, R. Willsch, V. G. Israelyan and A. W. Kuchta

579 **Study of phase and group index differences in polarization-maintaining single-mode fibres**
U. Röpke, J. Vobian and S. Jetschke

587 **All-fibre optical Solc and Lyot filters**
V. Reichel, B. Höfer, J. Vobian and W. Dultz

595 **Measurement of the birefringence in optical fibres by an elasto-optic method**
U. Röpke and S. Jetschke

605 **Ultrafast modulation of light by light**
H.-S. Albrecht, P. Heist, D. V. Lap, T. Schröder and B. Wilhelmi

617 **Real-time holographic interferometry using degenerated four-wave mixing in $Bi_{12}TiO_{20}$**
A. Kiessling and L. Wenke

629 ***Q*-switch and multipass amplification in a pulsed YAG laser using phase conjugation by stimulated Brillouin scattering**
M. Kramer, V. Brückner and E. Shatkovski

635 **A novel phase shift demodulation technique for optical interferometers using interference pattern generation**
W. Ecke, R. Landrock, V. Tschernjavskij and R. Willsch

647 **Two-frequency laser interferometric path measuring system for extreme velocities and high accuracies**
J. Müller and M. Chour

655 **Laser triangulation near the diffraction limit**
H. Rothe and H. Truckenbrodt

669 **The needle sensor—a micromechanical detector for atomic force microscopy**
K. Bartzke, T. Antrack, K.-H. Schmidt, E. Dammann and Ch. Schatterny

677 **Time-resolved absorption spectroscopy of polymethine dyes in Langmuir-Blodgett films**
K.-H. Feller, R. Gadonas, V. Krasauskas and A. Pugžlys

Regular Papers

685 **Characterization of commercial liquid crystal displays for adaptive pattern projection in industrial profilometry**
Temporal, spatial, and temperature-dependent properties
G. Sansoni, F. Docchio, U. Minoni and N. Viviani

705 **Thermal properties of buried-heterostructure diode lasers**
R. P. Sarzała and W. Nakwaski

727 **Theoretical and experimental study of a new delayed self-homodyne technique for laser spectral linewidth measurement**
D. Simeonidou, S. Hamidi and A. S. Siddiqui

737 **Magneto-optic current sensor using a double twist fibre**
H. Hirsch, D. Peier and U. Stietzel

743 **Deviation from Beer's law in multimode optical fibre evanescent field sensors**
F. P. Payne and Z. M. Hale

749 **Book reviews**

753 **Erratum**

755 **Index of Authors**
